INFORMATION GUIDE

PREGNANCY

SELF-CARE TIPS

- 1 Eat a nutritionally balanced diet including plenty of calcium and iron.
- 2 Drink plenty of water to stay hydrated.
- 3 Dieting for weight loss is not recommended during pregnancy.
- 4 Continue exercise in a normal routine unless advised otherwise by your doctor.
- 5 Your doctor may recommend prenatal vitamins with folic acid and iron.
- 6 Do not smoke, drink alcohol, or use illegal drugs.
- 7 Give yourself time to rest.
- 8 Do not discontinue prescribed medications without consulting a doctor, but also consult with a doctor before taking any non-prescription medications.
- 9 Create a group of safe people to support you.
- 10 Follow instructions on miscarriage and ectopic brochures if necessary.

First 12 Weeks

WEEK 1

Last menstrual period. Uterus is thickening to prepare for fertilized egg.

WEEK 2

Ovulation and conception.

WEEK 3

Sperm and egg have merged and travel down fallopian tube.

WEEK 4

Attachment to uterus. Cells start dividing into all future organs. Amniotic and yolk sac forming.

WEEK 5

Two tubes are formed: one for brain and spinal cord, the other for the heart which soon after begins beating.

WEEK 6

Eyes, lungs, limb buds, and digestive system begin forming. Brain and spinal cord developed.

WEEK 7

Limbs are sprouting out. Tongue forming. Hair growth starting.

WEEK 8

Face taking shape with eyes, nose, ears, and upper lip. Bones forming. Webbed fingers and toes present.

WEEK 9

Legs fully formed. Movement begins. Internal reproductive organs forming.

WEEK 10

Profile well defined. Eyes are open. Brain connections are forming. Fingers and toes no longer webbed. Fingerprint ridges start forming from friction.

WEEK 11

Fingernails and irises in the eyes are forming. External genitalia start forming.

WEEK 12

Kidneys start producing urine and teeth are forming.
